

Roller conveyors Type 550 Right-angle transfer unit

Suitable for:

Driven right-angle transfer unit

Right-angle transfer unit with pushers

“Flexibly changing product orientation”

The Type 550 Right-angle transfer unit changes the product orientation of crates, boxes and trays. Enables the right-angle transfer of products using various methods.

The solution to your logistics requirements when:

- The orientation of packed products (crates, boxes, trays) has to be changed
- Placing a curve is not possible in a specific location in the production process

The advantages of Type 550:

- Facilitates the safe transfer without requiring guides
- Facilitates changes in product orientation
- Can transfer various product formats without problems/without having to make adjustments to the unit
- Is effective in small production areas
- Supplied with a drive unit (for lifting products up) or pushers (for pushing products along the line)

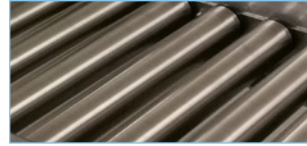

Roller conveyors

Type 550 Right-angle transfer unit
