

# Special machine Type 800 Metal detection

Suitable for:

## “Metal detection fully integrated in your transport system”

The Type 800 Metal Detector integrates metal detection and conveyor belts to create a total system. This combination has numerous advantages. Because of our in-depth experience with leading brand detectors, we can supply dependable total systems.

The solution to your logistics requirements when:

- Metal has to be detected in food
- Metal detection has to be integrated in your transport system

### The advantages of Type 800:

- Reliable metal detection
- Is more economical due to integration in the total transport system
- Will reduce the number of conveyor belt transfers
